

# Research Lab Work Day: Adding Detail

---

## Task One

Spend time researching. I expect you to get at least one *additional* full pages of notes (on binder paper) within 25–30 minutes on content of your subject, using reliable sources, and you *will* receive a daily grade. *This means you must focus.* You may use your own paper for this and giant writing requires more writing, and have your outline out to know what specific information you still need to research. **Refer to your outline to help you know which specific info you want to research.**

## Task Two

Based on your research, finish the official outline, editing and filling in concrete details where formerly you had vague information. (This will be due at the end of 2<sup>nd</sup> period today to the Google classroom.)

## Task 3, Step-by-Step

Visit my weebly website and view May 10th. Click on the button link titled “Adding Commentary.” This will take you to a helpful webpage which explains how to add commentary to your research details. **Read this first.**

Then, add commentary to four of your researched details below.

Choose four specific details from your research. You will write the detail *in your own words* (even if you already did in your notes) **AND** choose methods to write *two* sentences of commentary for *each* of your four details (that’s a **total of 8 sentences**. Use the models on the website for how long/ thorough they should each be—it’ll be clear if you choose to skimp the reading, and clear if you spend quality thought on this). Do this in the space provided on the next page.

**Method 1:** Offer opinion

**Method 2:** Offer an interpretation

**Method 3:** Offer insight

**Method 4:** Offer personal reflection

**Method 5:** Offer an evaluation
