

Non-journal warm-up

- Open up the attachment you began last class (Lead-in-quote-commentary, with the picture of Mickey Mouse) and go to p. 12
- To make things simpler, I've changed the directions a bit.
- Choose any THREE of the quotations (in addition to the model(s), and provide proper context as well as a lead-in to the quotation (but no commentary), based on last class's lesson.
- If you need help, review the information from the entire packet for help.
- When you are done, submit this to my Google classroom by doing the following:
 - Click on the square/arrow share button at the bottom
 - Open in Google classroom
 - Choose the correct assignment (menu button has a tiny arrow on the top on the right side. It's likely a math or science assignment that shows up, so click on it and choose (Lead-in-Quote-Commentary)
 - Then go BACK to the Google classroom app, refresh if necessary, click on the Lead-in-Quote-Commentary assignment, and click the blue button "Turn in."
